

FREE DENTAL SCREENING

Your child received a free dental screening in school by a dentist. To screen a dentist looks inside your child's mouth to see if there is decay. The dentist did not find any obvious cavities or other problems. This screening examination does not replace a full dental examination in a dental office since X-rays were not taken and instruments were not used.

Dental examinations in a dentist's office should be done twice a year to ensure your child gets good preventive care. We encourage you to visit your dentist. If you do not have a family dentist, you may contact the following agencies to see if your child is eligible for dental care:

- Medical Assistance Program 972-5300 (Community Health Care Dental Clinics)
- Manos de Cristo Dental Clinic 477-2319
- Medicaid 438-3280 or 800-252-8263
- Children's Health Insurance (CHIP) 1-800-647-6558

Dental Care is important—healthy teeth mean healthy smiles!

For more information or assistance, call St. David's Dental program at 879-6240.
